You will get a new window that will show the progress of your upload.

Once the video is uploaded you can give it a meaningful title, description and tags for searching. You should set the Privacy and publish setting to be Unlisted (anyone with the link can view) to prevent anonymous searching and location of your video. Once you have updated all of the information click on Save. The changes autosave but if the button is blue click on Save.

To obtain the URL to your uploaded video click on the Share button.

You will get a window that displays the video URL.
